Projects

Job Board

<https://github.com/m7md158/django-job-board>

Job Board website :this project include job , contact , home , login Apps, and method deal with these app , as create , edit , delete job , login and signup operation
Technology and tools : Django framework, Restful Api, ,postman.

Meal Rater Api Backend App

<https://github.com/m7md158/MealsReaterApi>

Backend App for Users rate specific meals, where each user rates the assignment only once,
Technology and tools : Django framework, Restful Api, ,postman.

ToDo List simple app

<https://github.com/m7md158/todolist>

Simple Todolist app by Pytho Django frame work.
Technology and tools : Django framework.

Online Market Place

https://github.com/m7md158/ Django_project

This final project of django frame work course is about online market palce .
Technology and tools : Django framework.

Customers Segmentation Analysis

https://github.com/m7md158/data_analysis_project

This project about analysis to the dataset for the customers segmentation .
Technology and tools : Python , Logistic regression and SVM algorithms.

Adult classification project

https://github.com/m7md158/ml_project1

In this project I use the ml algorithm as KNN-classifier , and used numpy and pandas libraries to preprocessing for the data set

Heart disease classifier

https://github.com/m7md158/nti_project_ml

this the final project for NIT summer training , in this project in this project I use the ml algorithm as KNN-classifier, Random-forest, Decision tree , and used numpy and pandas , sklearn libraries to preprocessing for the data set.

Web scraping

https://github.com/m7md158/web_scraping_project1

in this project i use python to get an information from wuzzf website, I collect Job title, company name, location, job skill, date of publish in csv file.

Certifications

NTI : Artificial intelligence summer internship

ITI: Applied Deep Learning RNN

IBM : Machine learning with python

Meta : introduction to Back-end

Meta : Database for Back-end

Technical Skills

- C++ / Python ,Algorithms, Data structure, Network, Linux.
- Django, Django Rest API , MySQL, Postman , HTML
- Machine Learning , Digital Image Processing , Deep Learning
- Git , GitHub, CMD, Postman , Google Colab .

Education

Menoufiya University Menoufiya Egypt B.Se, in Artificial intelligence,2026
